

Due: Friday 18 Sept 11:59

Project done: 50% of grade.

Time to **Go Live**. This assignment is the major production and public engagement component of the capstone. You will produce a refined design outcome and make it 'published' or 'implemented' as intended. This is the 'making public' part of your project. Now you will release your work, and try and engage your targeted communities or industries as much as possible. You should do this according to the plan you made in Assignment 1 (tweaks at this point, after you've now produced your work and you see what you've got, are totally acceptable and normal.) The whole idea of Assignment 2—*get it out there and see what happens!* You'll report on how it goes in Assignment 3, so it's a good time to take a look at that.

Your project must be made public, tested, launched, presented, distributed, or shared with a relevant audience or stakeholder group. Depending on your project, this may mean:

- publishing a website, video, digital campaign, or online resource;
- producing and distributing a printed publication or physical artefact;
- staging an exhibition, event, intervention, workshop, or experience;
- testing a service, system, or product prototype with users;
- presenting a campaign or proposal to stakeholders or community partners;
- releasing work through social media, newsletters, stores, public spaces, or community platforms.

Provide a link or an image as evidence of your project out in the world. All the other parameters for this Assignment you set yourself in Assignment 1. It's a good idea to take a look at the rubric to get a sense of how we'll grade your project.

In Week 9, we will be holding formal short presentations of your work-in-progress. The audience will be your peers, and some invited guests including other faculty members. These presentations will be graded and will represent 10% of your final grade.

Please read the assignment brief below very carefully.

BRIEF:

Assignment 2: PRODUCE, PUBLISH

Your submission for Assignment 2 is your finished and published project.

This submission is split into two deliverables:

1. ORAL PRESENTATION

In Week 9, on either Monday, Wednesday, or Thursday, you will stand up and present your work-in-progress to the class in a 4 minute presentation. At this stage we don't expect to see finished work, but rather this is an opportunity to speak about your work and receive questions and feedback from your peers and teaching team.

Worth 10% of your grade.

Due: Mon 14 Sept, Wed 16 Sept, or Thurs 17 Sept

2. YOUR FINAL PROJECT

This may be either a digital submission (websites, films, videos, apps, animations, etc) or a physical submission (books, other printed publications or constructed material).

NB: if your project is a physical object, please also upload high-resolution visual documentation (images) of this to Nuku as well as the physical submission.

Worth 40% of your final grade

Due: Friday 18 Sept 11:59

Statement on use of AI:

The use of AI tools and processes is not banned in this class, though I do caution against their use, and advocate for a considered approach. The use of AI generative tools is allowed in this course under the following conditions:

- if you use an AI image- or text-generation tool on an assignment, you must tell us what tool you used and how you used it
- keep a note of the exact prompts you provided the tool; how many drafts you generated; and how you curated or modified the resulting generated texts or images
- do not use individual creators' names in your prompts
